

Spirulina Extract

Production Method

Freshwater-grown Chlorella algae are harvested, cell-disrupted for bioavailability, then spray-dried into powder after filtration and sterilization.

Component

Rich in chlorophyll, plant-based protein, vitamins (B12, C), and minerals (iron, magnesium).

Function

Heavy metal detoxification Immune system modulation
Antioxidant support Energy enhancement

Specification

Appearance: Blue Powder

Solubility: Insoluble in Water

Content: 60% Protein

Advantages

High bioavailability nutrients; Customizable protein/chlorophyll ratios; Neutral taste adaptation.

Packaging&Storage

Each paper drum contains 25kg of the product, which is Packed in sealed aluminum foil bags with plastic lining or sealed double plastic bags. Please store in cool and dry places.

Application

Superfood supplements

Functional food fortification
