

Fenugreek Extract

Production Method

High-quality fenugreek seeds are extracted using ethanol or water, then purified and concentrated.

Component

Fenugreek extract primarily contains saponins, flavonoids, and dietary fiber like galactomannan.

Function

Blood sugar support
Anti-inflammatory

Digestive health
Lactation enhancement

Specification

Appearance: Brown Fine Powder

Solubility: Water Soluble

Content: saponin 50%

Liposome encapsulating fenugreek extract (LNF) facilitated a sustained release and significantly enhanced skin penetration. This nanoformulation helps to enhance the potency of fenugreek extract acting as an anti-aging agent by inducing collagen production and inhibits UV-induced MMP1 and MMP9 release in co-culture skin models.

Advantages

High saponin potency; Adjustable galactomannan levels; Customizable powder texture.

Packaging&Storage

Each paper drum contains 25kg of the product, which is Packed in sealed aluminum foil bags with plastic lining or sealed double plastic bags. Please store in cool and dry places.

Application

Nutritional Supplement

Skincare
