

## Sodium Copper Chlorophyllin

### Production Method

High-quality plant chlorophyll is converted via saponification and copper substitution, then purified and stabilized as water-soluble sodium salts.

### Component

Primarily contains copper chlorophyllin derivatives, sodium salts, and stabilizers.

### Specification

Appearance: Dark Green Powder

Solubility: Water Soluble

Content: E568

### Advantages

High color stability; Adjustable copper content; Customizable green intensity.

### Packaging&Storage

Each paper drum contains 25kg of the product, which is Packed in sealed aluminum foil bags with plastic lining or sealed double plastic bags. Please store in cool and dry places.

### Application

Food coloring

Cosmetics
