

Soybean Extract

Production Method

High-quality soybeans undergo ethanol extraction or cold-pressing, followed by purification and concentration.

Component

Soybean extract primarily contains isoflavones (e.g., genistein, daidzein), saponins, and soy protein.

Function

Hormonal balance regulation Antioxidant activity
Bone health support Cardiovascular protection

Specification

Appearance: Bown Powder

Solubility: Water Soluble

Content: 40% isoflavone

Advantages

Standardized isoflavone potency; Non-GMO sourcing; Combined bioactive synergy

Packaging&Storage

Each paper drum contains 25kg of the product, which is Packed in sealed aluminum foil bags with plastic lining or sealed double plastic bags.Please store in cool and dry places.

Application

Women's Health Supplements

Functional Foods
